

LED EYELASH EXTENSION

Experience the Next Generation of Lash Luxury

Benefits of LED Eyelash Extensions

● Long-Lasting Beauty

The specialized adhesive delivers high performance in durability, making your extensions last longer than conventional eyelash extensions.

● Minimal Irritation

The adhesive instantly hardens with LED light, making it less irritating and providing a comfortable experience.

● Immediate Face Washing

Since the adhesive hardens completely and instantly, you can go to the gym, hot yoga, or sauna right after the procedure!

● Oil Cleanser Compatible

You can use standard oil cleansers! This expands your skincare options.

LED Eyelash Extension Procedure

The basic procedure is the same as conventional methods. Please relax during the treatment.

START

We prepare by applying tape.

Eye Patch

Special sheet protects your eyes from light.

LED Application

After each lash, with minimal sensation.

Complete Look

Your desired number of lashes with less irritation.

Safety First: Choose Matsukaze LED

The light used around your eyes in our salon has been certified to comply with international standard IEC62471(JIS C7550), which is used to evaluate the photobiological safety of lights on skin and eyes, by Japanese specialist institutions.

Matsukaze is a Japanese eyelash extension manufacturer that prioritizes safety in product development. We use high-quality adhesive produced entirely in Japan, from raw materials to finished product. We aim to provide products that are gentle on both practitioners and customers.
